

OPEN SEMINAR AT 16.00 IN AARHUS ON MAY 10th

A JOURNEY FROM ACTION-BASED TEACHING TO ACTION RESEARCH WITH LOOPME

At this seminar our CEO Carin Sävetun will showcase how LoopMe is used by thousands of teachers around Europe to design and assess action-based education. Our co-founder Martin Lackéus, researcher at Chalmers University of Technology, will also show how to conduct research on learning and education by using LoopMe for data collection and analysis through *Designed Action Sampling* (DAS).

LoopMe is an innovative digital tool that makes it easy and fun for teachers and researchers to design, deliver and study action-reflection journeys. A social media-inspired design makes it intuitive and user-friendly, and also facilitates assessment of learning-by-doing in a time-efficient way.

**WELCOME TO ROOM E0.05,
VIA UNIVERSITY COLLEGE,
CAMPUS AARHUS C,
MAY 10th AT 16.00-16.45**

and secure your spot.
Seats are limited.**

LOOPME FOR TEACHING

LoopMe is a digital teaching tool tailored for action-based learning. With help from LoopMe, teachers can lead and follow each individual student through the emotional roller-coaster of experiential action-based education. Get started by revising a predefined content package at library.loopme.io, or design your own action-reflection loops from scratch. Data is securely stored and GDPR safe.

LOOPME FOR RESEARCH

LoopMe is a digital research tool tailored for empowering a new scientific method called *Designed Action Sampling* (DAS). Teachers or researchers co-design action-oriented step-wise experiments that are then carried out by other teachers, who reflect in written form afterwards upon effects they see. This results in high-quality data on cause-effect patterns. LoopMe combines strengths from action research, design science, experience sampling and critical realism.

OR USE QR CODE BELOW

We will confirm by sending you a research article about *Designed Action Sampling*.

ACTION-REFLECTION LOOPS MADE EASY AND FUN

“A reflective journey for our students in a fresh, social-media interactive form”

Britta Gossel, Eberswalde University
for Sustainable Development

“LoopMe saves us time by making visible what happens in work-based learning”

Sofie Holm
Academedialog vocational schools

“I’ve been given new eyes to see with on a deeper level”

Jonas Boström
Mid Sweden University
